

SOUTHLAKE CORP

AUTOMATIC BOBBIN CHANGER

**For
FILTER MAKING & CIGARETTE MACHINES**

The SPI range of Automatic Bobbin Changers can be linked to most Cigarette / Filter / Cigar making machines. These units can be supplied in different horizontal or vertical formats to suit most requirements to give full automatic bobbin changing and splicing at full speed.

These compact units can be positioned at the end of the machine either at right angles to the normal paper run, or in line.

Main Features

- Compact unit – Facility to accept large bobbin diameters, Prices on request
- Outputs available for splice eject signal with shift register & cut pulse link up signals.
- HMI touch panel for easy operation and alarm status.
- Adjustable paper tension control to machine.
- Scrap paper discharged to lower reservoir.
- Quick release bobbin hubs with NO loose parts.
- Cost saving facility, to use all the paper from the empty bobbin to the last meter.
- Versions available for speeds up to 600 Mtrs/Min
- Constant paper tension to parent machine, even with porous paper.
