AP-2 ADHESIVE PUMP ASSEMBLY

For

USE WITH *S.P.I.* RANGE OF DUAL PUMP MOTORS

The AP-2 Adhesive pump assembly is used in conjunction with the range of *S.P.I.* range of Pump motors. These Micro Precision Pumps are separate plug in units manufactured from 316 stainless steel. They are fully enclosed with magnetic coupling, to the motor, eliminating any rotating seals to ensure long life & reliability.

Main Features

- “Plug in” Stainless Steel Pump Assemblies giving accuracy of flow.
- High flow rates can be produced.
- Suitable for most types of aqueous adhesives.
