APM-3 ADHESIVE PUMP & MOTOR ASSEMBLY

For

USE WITH *S.P.I.* RANGE OF PUMP CONTROLLERS

The APM-3 is a Single Adhesive pump assembly to be used in conjunction with the range of *S.P.I.* PC Pump Controllers. The Micro Precision Pump is a separate plug in unit manufactured from 316 stainless steel. The pump is fully enclosed with magnetic coupling, to the motor, eliminating any rotating seals to ensure long life & reliability. The motor is a brushless type servo motor ensuring accuracy of flow & no possibility of “burnout”.

Main Features

- “Plug in” Stainless Steel Pump Assemblies giving accuracy of flow.
- High flow rates can be produced
- Suitable for all filter & dual rod making machines.
