CPSA1011SYSM – SIDE SEAM PUMP UPGRADE APPLICATION

For HAUNI PROTOS MAKING MACHINE

The CPSA1101SYSM Pump Seam Application System is designed for specific use on the Hauni range of Protos Cigarette making machines as an up-grade to the existing gravity feed system. The system incorporates a single channel microprocessor pump control PC-1 with touch panel LCD screen for displaying flow information & operator interfacing. The MP-2 Mounting plate incorporates the single Adhesive Pump and Motor and the necessary associated parts to interface with the existing Gravity Applicator & Retracting Stand.

Main Features

- New compact design PC-1 Microprocessor Pump Controller with latest surface mount technology, with low level mounting.
- Large LCD for viewing all flow & machine settings information.
- Touch panel for: - Data entry; Calibration; Bleeding system.
- Live adhesive flow adjustments can be made during production to 0.01g
- Fully enclosed stainless steel pump with magnetic coupling, eliminating all rotating Seals to ensure long life & reliability.
- Inexpensive Paper driven encoder for easy installation & accuracy.
