FILTER MAKING WITH PVA

FILTER PUMP SEAM (PVA) APPLICATION & LINE OR SPRAY TOW RETENTION SYSTEM FOR ALL PLUG MAKING MACHINES

The FPSA - PVA application system can be supplied to suit all makes of filter making machines. The system incorporates two micro pumps, one for the seam application and one for the tow retention. Both pumps are individually controlled via the PC-2 Micro controller, via the touch panel LCD screen.

Main Features

- Dual channel micro-controller with large touch panel LCD screen
- Dual pumps individually controlled for flow proportional to machine speed.
- Diverter plate assembly supporting all applicators on adjustable stands & paper guide
- Lines or scatter spray application for tow retention.
- Twin Rod Heaters - Automatic raise & lower with programmable machine speed.
- Adhesive Reservoir & stand with automatic level control.
