

SOUTHLAKE CORP

RWM-1 FOIL REWIND UNIT Incorporating LDA-1 MENTHOLATING UNIT

The RWM-1 Foil Rewind/Mentholator has been designed specifically to unwind reels of aluminium foil and apply a controlled dosage of “HEATED” Menthol to the tissue side of the foil, before rewinding the foil into a completed reel, ready for the packing process.

Main Features

- High rewind speeds in excess of 700 feet/min.
- Accurate menthol flow giving + or – 3% mg/cigarette.
- Pre heating of foil to improve menthol absorption.
- “Alcohol free” application.
- Programmable speed and brand specification via touch panel screen.
- Automatic foil edge control.
- Automatic tension compensation control.
- 40 Kilo capacity menthol tank
