SM-6 SPRAY MANIFOLD

**FOR CONTROLLING THE ANCHOR SPRAY SWIRL VALVE
APPLICATOR ON AN *S.P.I* DUAL PUMP SYSTEM**

The SM-6 Spray Manifold has been designed specifically to drive the Anchor Spray Swirl Applicator when using a S.P.I pump System. The Solenoid Manifold incorporates 3 solenoid valves and a special flow restrictor for controlling the spray air and cleaning air cycle when connected to either the PC-2 or the PC-2H Dual Pump Controller. When used with the range of Diverter Plates, this solenoid manifold is mounted on the rear of the plate.
