## **TLP-1 TANK LEVEL PLATFORM**

**For**

**GIVING LOW LEVEL ALARM FOR RANGE OF ADHESIVE  
PRESSURE TANKS**

The TLP-1 Tank Level Platform Unit is a unique product giving a Low level output indicating the state of the adhesive level within the pressure tank. Because the unit is sensing the weight of the adhesive, there are no electrical sensors mounted on or in the tank that can be corrupted with dried adhesive.

The platform is fitted with tank locators and will accommodate any type of adhesive pressure tank up to 350mm Dia ( 14") with a total full weight of 100 Kg. As the unit has no moving parts and manufactured from stainless steel, any spillage of adhesive will not impair performance and can be easily wiped off the surface.

### **Main Features**

- Sturdy construction in Stainless Steel.
- Customer adjustable Low Level output to suit any Adhesive tank.
- Voltage free alarm output.
- Various sizes to suit special tanks can be provided.
